About SAS AeroSurvey

SAS AeroSurvey is an emerging drone survey and data processing startup focused on delivering accurate, reliable, and cost-effective aerial solutions across India. Our core team brings over 5 years of strong hands-on experience in drone-based mapping, modeling, & data analytics.

We are passionate about helping clients in sectors like infrastructure, mining, roadways, smart cities, and utilities access high-quality geospatial data for better planning and faster execution. By combining the latest UAV technology with technical know-how, we aim to solve real-world problems with smarter, safer, & more scalable drone solutions.

Our Services

- Topographic Survey & GIS Mapping
- Drone 3D Modeling & Contour Generation
- Digital Elevation Models (DEM/DTM)
- Orthomosaic Mapping & High-Resolution Imagery
- Volumetric & Stockpile Analysis
- Powerline & Transmission Tower Inspection
- Smart City Planning & Infrastructure Mapping
- Road, Railway, and Bridge Corridor Mapping
- Mining Survey & Pit Volume Calculation
- Solar Line Inspection & Cooling Tower Inspection

Our Mission

At SAS AeroSurvey, our mission is to deliver highly accurate, reliable, & precision-driven aerial data through advanced drone technologies & industry-best practices.

We empower civil engineers, urban planners, infrastructure developers, mining consultants, utility managers, and government agencies with the actionable geospatial insights they need to make faster, smarter, and safer decisions.

By leveraging high-resolution aerial mapping, 3D terrain modeling, volumetric analysis, and automated drone inspection workflows, we eliminate guesswork & enhance project planning, monitoring, & execution.

We are committed to driving operational excellence across sectors like infrastructure development, transportation, smart cities, renewable energy, & water resource management, while ensuring cost-efficiency, data transparency, and accuracy at every step.

Why Choose Us?

- ✓ Experienced Team with 5+ Years Hands-on Expertise
- ✓ Cutting-edge UAV Technology
- ✓ Fast, Reliable, and Scalable Solutions
- ✓ Customized Service for Every Industry
- ✓ Quality Data for Smarter Decisions

Sectors We Serve

- Infrastructure Development
- Mining & Resource Management
- Roadways & Transport
- Smart City Projects
- Renewable Energy Projects
